PROFILE

I have experience in developing the front-end of websites, applications, and desktop applications. I also have 4 years of experience in developing the front-end. I worked for the Inmotion Production Company and dealt with many clients on freelance sites such as Upwork, Mostaqeel, and Fiver over a period of time. I love learning very much and I love Developing myself to always be different

Really Great Company

- I worked in the iMotion Production Company located in the city of Media Production in 6th of October City.
- I worked as a volunteer in the Google DEVFEST organization, which is responsible for holding technical events to teach beginners programming. I was one of the organizers of the events.
- I also worked on freelance websites
- I have a technical team on freelance websites called MAGIA. This team was established in 2023
