FRONTEND DEVELOPER

I am a developer A front-end interface for websites, applications, and desktop applications. I have developed projects for some institutions in Egypt, such as ordering applications for the Al-Maram Pharmacies Group and websites for some institutions in the Media Production City. When I worked at Inmotion production company

PROJECTS

Macros library with Rust

CSS Framework (CSS-Vita)

ADBToolKit

Al-Maram App (React Native)

AkCLI (CommandLine)

AKGames website (React js)

Vithub website

Servo Browser (Rust)

Scanner App (React Native)

EXPERIENCE

Companies

I started programming at 2019, I learned the languages required in the web because this is my passion, and I created projects for large companies and institutions. I worked for the Animation Production Company, which is based in the Media Production City in 6th of October. I have participated in many Google events and extensive training, and now I work on freelance websites I always like to develop myself, so I learned the Rust programming language because through it I will implement some ideas that cannot be done in web languages.

Technologies

Html, CSS, JavaScript,

BootStrap, Sass, React js,

React Native, Tauri.Rs And Electron.js
